

SUMMARY

Becoming a skilled front-end developer is my top career priority, and I'm highly motivated to achieve this goal. A year ago, I made a big career change. I moved on from a role in architectural design to fully focus on tech and programming. It's been a year of intense learning, where I've used a variety of online courses, and tutorials to get to grips with JavaScript, React, etc. I've also spent a lot of time building my own projects to put my new skills into practice. My past experience in architectural design isn't forgotten, though; it has actually given me a unique understanding of how design and layout can impact the user. I know what looks good and how to make things easy for the user to understand. I'm now super eager to find a front-end development role where I can use both my design background and my new coding skills. I want to be part of a team that values creativity and technical skill, and where I can keep growing and learning.

EDUCATION

Isfahan Azad University

Bachelor's Degree in Architectural Design
2011 – 2015

Politecnico Di Milano University

Master Degree in Architectural Design
2016 – 2018

University of Southern Denmark

Researcher at programming in architecture
2018 – 2019

TECHNICAL SKILLS

- HTML, CSS, JavaScript
- Responsive Web Design
- Frameworks: React
- Version Control: Git, GitHub
- Design Tools:
Adobe(illustrator,indesign,photoshop),
Figma

SOFT SKILLS

- Strong communication and collaboration skills.
- Detail-oriented with a keen eye for design.
- Problem-solving and critical thinking.
- Adaptable and eager to learn new technologies.

CERTIFICATIONS

- Complete Web Developer in 2023: Zero to Mastery
- JavaScript: The Advanced Concepts

PROFESSIONAL EXPERIENCE

H&M Clone

- **Description:** Developed a responsive e-commerce web application inspired by popular fashion brands, integrating various product categories, user authentication, shopping cart functionality, and user profiles.
- **Technologies Used:** React, React Router, Redux Toolkit, Firebase for authentication and data storage and tailwind.
- **Features:**
 - **Dynamic Product Display:** Implemented dynamic routing and data fetching to display products based on categories and specific product codes.
 - **User Authentication:** Integrated user login, signup, and profile management using Firebase.
 - **Shopping Cart & Favorites:** Designed features for users to add products to their shopping cart and mark products as favorites.
 - **Responsive Design:** Ensured a seamless user experience across devices with responsive layouts and components.
 - **Custom Layouts:** Developed a consistent UI with custom layouts, including a main layout with integrated navigation and footer components.
- **Design Integration:** Leveraged architectural design principles to create an aesthetically pleasing and user-centric interface, emphasizing clear visual hierarchies and intuitive user flows.

Shazam Clone

- **Description:** Developed an interactive music discovery platform that allows users to explore songs by genres, access top charts, and get details about artists and individual tracks. The application integrates a music player with play, pause, and volume control functionalities.
- **Technologies Used:** React, Redux Toolkit, Shazam API for music data.
- **Features:**
 - **Dynamic Music Discovery:** Implemented a "Discover" page where users can explore songs based on selected genres.
 - **Integrated Music Player:** Built a custom music player component with functionalities like play, pause, volume control, and track progression.
 - **Search & Details:** Incorporated search functionality and detailed views for artists and songs, enhancing user engagement.
 - **State Management:** Utilized Redux Toolkit for efficient state management, handling actions like setting the active song, navigating between tracks, and updating playback status.
- **Design Integration:** Applied architectural design principles to ensure a cohesive and user-friendly interface, emphasizing intuitive navigation and a harmonious color palette.

Architectural Designer Internship

- 2022-2022
- VenhoevenCs, Amsterdam, 6 month
- Designed residential buildings from concept to completion.
- Collaborated with multidisciplinary teams to ensure design integrity and client satisfaction.

Freelancer Architecture Designer

- 2019-2022
- Freelancer, 3 year
- juggling various clients and projects helps you become proficient in managing time, resources, and milestones.

Architectural Internship

- 2014-2015
- Farasaaz, Iran, 1 year
